TECHNOLOGY & ENGINEERING EXECUTIVE | CTO / VP ENGINEERING

LARGE-SCALE ENGINEERING LEADERSHIP & ORGANIZATIONAL TRANSFORMATION

Technology & Engineering Executive with **20+ years of experience** leading large-scale engineering delivery and organizational transformation in complex regulated environments, driving execution clarity and predictable outcomes at **enterprise scale**. Proven track record driving execution clarity and delivery predictability across enterprise platforms involving **60+ teams (500+ engineers)**. Combines executive leadership with deep hands-on engineering expertise, enabling pragmatic alignment between strategy, architecture, and execution. Known for structuring operating models at scale, resolving delivery deadlocks in complex organizations, and enabling sustainable execution under high constraints.

EXPERIENCE

SOCIÉTÉ GÉNÉRALE - Program Delivery Lead, SG Group Cloud Platform & Security (2019-Present) FRANCE

Enterprise-scale delivery leadership for Société Générale's **global hybrid cloud platform** supporting regulated banking workloads at global scale

- **Contributed to the transformation of traditional IT into a global hybrid cloud operating model at enterprise scale**
- Led large-scale engineering execution across 60+ teams (~500 engineers)
- **Drove operating model evolution and enterprise delivery governance** across a multi-domain platform organization
- Established cross-domain execution frameworks improving flow efficiency and organizational alignment
- Resolved major organizational and technical dependency bottlenecks across engineering, platform, and business domains
- **Established reusable delivery steering frameworks adopted across multiple platform trains**, institutionalizing execution capability at scale

FINAXYS - Chief Information Officer (CIO) (2016-2019) FRANCE

- Led outcome-based engineering delivery in Big Data and DevOps environments for Tier-1 banking clients
- Managed ~30 people across delivery teams, academy, and external vendors
- Built and scaled an engineering academy supporting ~350 consultants
- Owned technical pre-sales, delivery commitments, and engineering capability development

MERITIS - Chief Technical Officer (CTO) (2016) FRANCE

- Designed company-wide engineering initiatives including recruitment frameworks and technical learning platform
- Launched engineering programs improving technical evaluation and knowledge sharing at scale

EARLY CAREER - Engineering Leadership & Quantitative R&D (2004-2015) FRANCE, UK & BELGIUM

Progressed from quantitative R&D engineer in investment banking (Natixis CIB) to engineering leadership roles delivering enterprise platforms, ERPs, and distributed systems. Managed multi-project delivery and engineering teams while maintaining strong hands-on architecture responsibilities. Former French Army officer.

SELECTED TECHNICAL PROJECTS (ONGOING)

- **Applied AI Processing Pipeline** - Designed scalable batch image/video enhancement workflows using modern AI super-resolution models
- **Legacy System Reverse Engineering** (5,000+ hours) - Built open-source tooling modernizing undocumented proprietary software systems
- **Performance Engineering Tooling** - Optimization software adopted by thousands of users and acknowledged by industry developers
- Competitive algorithmic programming (Top 0.3% worldwide - [codingame](#))

Continued hands-on engineering work alongside executive leadership responsibilities.

EDUCATION & CERTIFICATIONS

- **Engineering Degree in Information Technology (Master's level)** - EPITECH (Vice Major)
- Certified SAFe® Program Consultant (SPC)

CORE EXPERTISE

Executive Leadership • **Engineering Leadership** • Cross-functional Team Leadership • **Engineering Management** • IT Strategy • Large Scale Transformation • Operating Models • Organizational Design • Program Delivery Management • Stakeholder Management • Systems Thinking • Scalability • Complex Systems • Technical Leadership • Software Architecture • Distributed Systems • Problem Solving
