SENIOR TECHNOLOGY & ENGINEERING LEADER

ENGINEERING LEADERSHIP AT SCALE (600+ ENGINEERS) | EXECUTIVE EXPERIENCE: FORMER CTO & CIO

20+ years of experience shaping engineering organizations in highly regulated environments, from hands-on quantitative development to CTO and CIO roles, and today engineering delivery leadership across a 600-engineer cloud platform organization. At Société Générale, my scope expanded three times in seven years: from ~130 engineers to the full 70+ team organization spanning cloud platform, security and IAM, while the platform scaled to thousands of applications and millions of infrastructure resources. **Targeting Director of Engineering, VP Engineering and CTO roles**.

EXPERIENCE

Engineering Delivery Lead - SOCIÉTÉ GÉNÉRALE, Group Cloud Platform, Security & IAM, FRANCE (2019-Present)

Senior engineering delivery leadership for the Group's global hybrid cloud platform (private cloud, AWS, Azure) supporting thousands of regulated banking applications:

- Entrusted with **three successive scope expansions**: from delivery leadership of ~130 engineers (private cloud) in 2019 to the full **70+ team, ~600-engineer** organization spanning cloud platform, security services and Group IAM
- Restored delivery predictability **from 50% to 80%** in the initial phase, then maintained **~90% predictable delivery** of business-critical transformation initiatives at full scale despite major resource constraints
- Shaped the platform operating model and designed **reusable execution frameworks** improving organizational efficiency by **~45%** and cutting recurring coordination workload by **~95%**
- Scaled the platform to **100+ cloud services** and **millions of infrastructure resources** supporting critical regulated workloads
- Resolved complex cross-domain technical and organizational dependencies across cloud, security and IAM engineering
- **Finalist (Top 3) - Société Générale Group IT Innovation Awards 2024** for engineering delivery transformation

Chief Information Officer (CIO) - FINAXYS, FRANCE (2016-2019)

- Executive leadership for a consulting firm delivering **Big Data and DevOps programs to Tier-1 banks**
- **Managed 30 engineers and consultants** across delivery teams and vendors; owned technical pre-sales and delivery commitments for complex engagements
- Built an **engineering academy supporting 350 consultants**; capability initiatives (academy, hackathons, community events) **helped grow the company by 100+ employees**

Chief Technical Officer (CTO) - MERITIS, FRANCE (2016)

- Designed company-wide engineering initiatives: **technical recruitment and evaluation frameworks**, selection of 360Learning for internal training, and competitive programming programs fostering a culture of engineering excellence

EARLY CAREER - Engineering Management & Quantitative R&D FRANCE, UK & BELGIUM (2002-2015)

- **Director of Development, Square IT Services** (2013-2015): led a 9-person engineering team across 9 concurrent projects delivering ERPs, web platforms and mobile applications
- **Project Manager, Veolia Propreté** (2010-2013): led a 12-person team; delivered the **main ERP adopted by 80+ organizations**; introduced Scrum practices
- **IT Quant & Software Engineer, Natixis CIB and SG CIB** - Paris & London (2004-2010): delivered **50+ production systems** for equity and commodity derivatives front offices and risk management
- **Officer, French Army** - 17th Parachute Engineer Regiment (2005): deputy officer for command and logistics, leading ~15 personnel

SELECTED TECHNICAL PROJECTS

Ongoing hands-on engineering practice alongside executive responsibilities:

- **Applied AI processing pipeline**: scalable batch image/video enhancement using state-of-the-art super-resolution models (Real-ESRGAN, Real-CUGAN)
- **Star Wars Rebellion Editor & 25th Anniversary Patch**: 5,000+ hours of assembly-level reverse engineering and modernization of a legacy proprietary game engine
- **SWTOR Unleashed**: performance engineering tooling adopted by 5,000+ users and publicly acknowledged by BioWare staff
- **Competitive programming: top 0.3% worldwide** on CodinGame

EDUCATION & CERTIFICATIONS

Engineering Degree in Information Technology (Master's level) - **EPITECH (Vice Major) -** Certified SAFe® Program Consultant (SPC)

CORE EXPERTISE

Executive Leadership • Engineering Leadership • Engineering Management • Organizational Design • Operating Models • Large Scale Transformation • Platform Engineering • Cloud Infrastructure (Private Cloud, AWS, Azure) • Security • IAM • Distributed Systems • Software Architecture • Program Delivery Management • Stakeholder Management • Talent Development • Systems Thinking

Languages: French (native) · English (fluent)

Selected public talks and enterprise engineering transformation presentations
