TECHNOLOGY & ENGINEERING EXECUTIVE | CTO / VP ENGINEERING LARGE-SCALE ENGINEERING LEADERSHIP & ORGANIZATIONAL TRANSFORMATION

Technology & Engineering Executive with 20+ years of experience leading large-scale platform engineering organizations and driving transformation in complex regulated environments. Currently leading delivery of a global hybrid cloud platform powering thousands of enterprise applications across 60+ teams (~500 engineers). Recognized for enabling ~90% predictability on key delivery initiatives, improving organizational efficiency by ~45%, and driving pragmatic adoption of AI-driven engineering practices at enterprise scale.

EXPERIENCE

SOCIÉTÉ GÉNÉRALE - Program Delivery Lead, SG Group Cloud Platform & Security (2019-Present) FRANCE

Engineering delivery leadership for the bank's global hybrid cloud platform supporting regulated workloads at enterprise scale:

- Led engineering execution across 60+ teams (~500 engineers) powering thousands of applications across private cloud, AWS and Azure
- Scaled the platform to 100+ cloud services and millions of infrastructure resources supporting critical regulated workloads
- Maintained ~90% predictable delivery of business-critical cloud transformation initiatives despite major resource constraints
- Designed reusable frameworks improving organizational efficiency by ~45% and reducing multiple recurring coordination workloads by ~95%
- Finalist (Top 3) - Société Générale Group's IT Innovation Awards for engineering delivery transformation

FINAXYS - Chief Information Officer (CIO) (2016-2019) FRANCE

- Led outcome-based engineering delivery in Big Data and DevOps environments for Tier-1 banks
- Managed 30 engineers and consultants across delivery teams and vendors
- Built engineering guilds and academy supporting 350 consultants and contributed to the company's growth by 100+ employees through technical capability initiatives (academy, hackathons, engineering community events)

MERITIS - Chief Technical Officer (CTO) (2016) FRANCE

- Designed company-wide engineering initiatives including technical recruitment frameworks and an internal learning platform
- Launched engineering programs improving technical evaluation, knowledge sharing and engineering capability development
- Introduced company-wide competitive programming initiatives, fostering a culture of engineering excellence

EARLY CAREER - Engineering Leadership & Quantitative R&D (2004-2015) FRANCE, UK & BELGIUM

- Led development of the main ERP system used by 80+ organizations in waste-management operations (Veolia Propreté)
- Delivered 50+ production systems and 80+ trading systems as IT Quant (Natixis CIB, Equity and Commodity Derivatives Front Office)
- Former French Army officer (17th RGP, Commanding and Logistic company)

SELECTED TECHNICAL PROJECTS

Maintaining hands-on engineering practice alongside executive leadership responsibilities:

- Applied AI Processing Pipeline: scalable image/video enhancement workflows using modern AI super-resolution models
- Star Wars Rebellion Editor & 25th Anniversary Patch: 5,000+ hours reverse engineering and modernization of legacy proprietary game
- SWTOR Unleashed: performance engineering tooling improving game engine resource management, adopted by thousands of users
- Competitive algorithmic programming: Top 0.3% worldwide @ [CodinGame](#)

EDUCATION & CERTIFICATIONS

- Engineering Degree in Information Technology (Master's level) - EPITECH (Vice Major)
- Certified SAE® Program Consultant (SPC)

CORE EXPERTISE

Executive Leadership • Engineering Leadership • Cross-functional Team Leadership • Engineering Management • IT Strategy • Large Scale Transformation • Operating Models • Organizational Design • Program Delivery Management • Stakeholder Management • Systems Thinking • Scalability • Complex Systems • Technical Leadership • Software Architecture • Distributed Systems • Problem Solving

Languages: French (native) • English (fluent)
